Ideas for the mobility of the future

Apply with us as

Developer Test Automation Software m/f/d

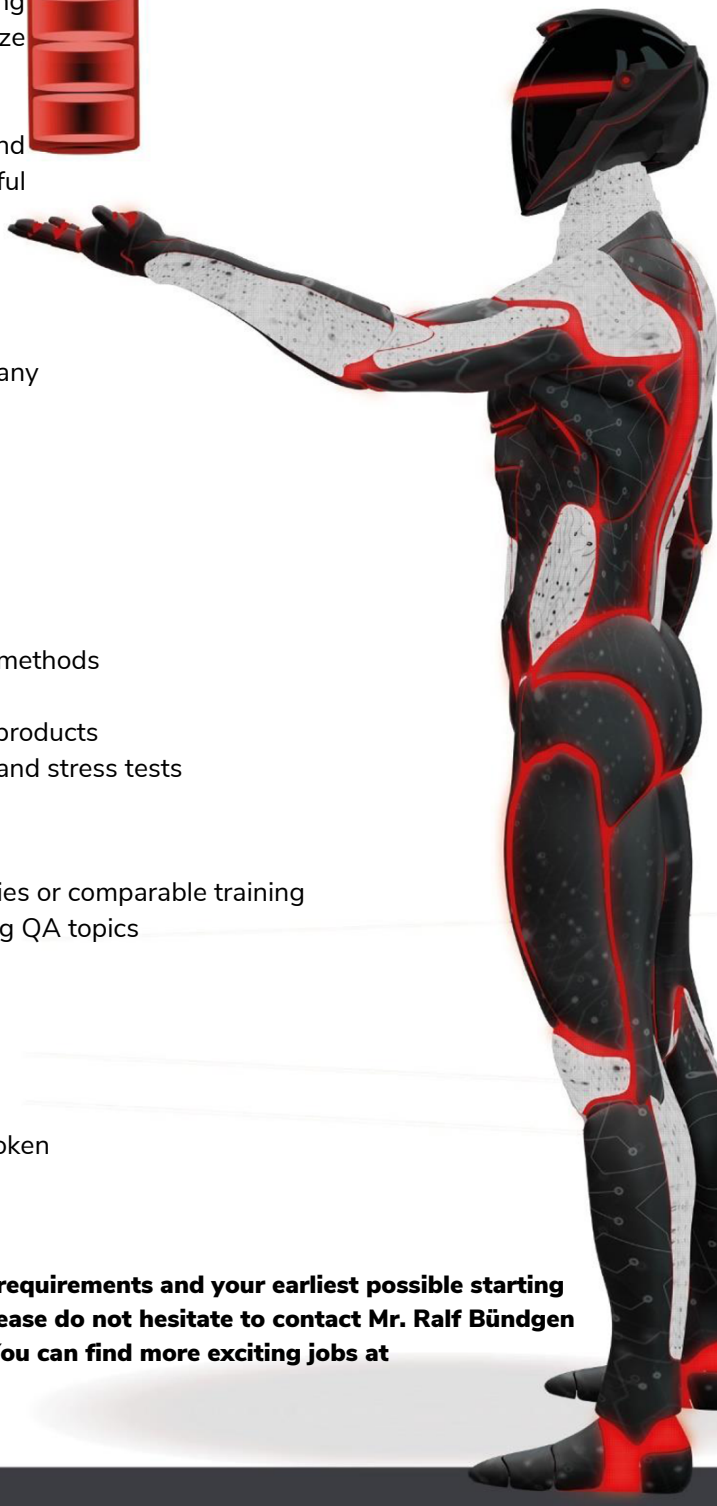
CONTACT PERSON

RALF BÜNDGEN

jobs@digatron.de

Digatron opens the way to electric mobility with intelligent test systems and computer-controlled equipment for research, production and quality assurance of battery systems. Through our test equipment and systems, we enable the world's leading development labs and manufacturers to produce and optimize today's and tomorrow's energy storage systems.

With locations in Germany, USA, China, India and Italy, around 320 colleagues support the trend towards ever more powerful battery systems from very small to very large scale.



WE OFFER YOU

- a responsible position in a very successful and growing company
- a permanent employment contract
- flexible working hours (37.5 hours/week)
- mobile work
- 30 days of vacation
- individual training and further education offer

YOUR TASKS

- collaboration in an agile team and with modern development methods
- conception and optimisation of our test strategies
- further development of our automated tests for our software products
- planning and monitoring of integration, system, performance and stress tests

YOUR QUALIFICATIONS

- successfully completed engineering or computer science studies or comparable training
- several years of experience in software development, including QA topics
- good knowledge of C++ and/or C#
- good knowledge of Office applications
- ISTQB certification desirable
- strong teamwork and communication skills
- desire and fun to develop further
- good knowledge of German and English, both written and spoken

Please send us your application documents including your salary requirements and your earliest possible starting date by e-mail to jobs@digatron.de. If you have any questions, please do not hesitate to contact Mr. Ralf Bündgen at +49-241-16809-858 or the above-mentioned e-mail address. You can find more exciting jobs at www.digatron.de
