

# Ideas for future mobility

Digatron opens the way to electric mobility with intelligent test systems and computer-controlled equipment for research, production and quality assurance of battery systems. Our test equipment and systems enable the world's leading development laboratories and manufacturers to produce and optimise today's and tomorrow's energy storage systems.

Around 250 colleagues work at locations in Germany, the USA, China, Italy and India to develop customised and precisely fitting solutions for our customers and to be a leading supplier in this market with pioneering technology.
