

# Ideas for the mobility of the future

Apply with us as

## Hardware Test Engineer m/f/d

Digatron opens the way to electric mobility with intelligent test systems and computer-controlled equipment for research, production and quality assurance of battery systems. Through our test equipment and systems, we enable the world's leading development labs and manufacturers to produce and optimize today's and tomorrow's energy storage systems.

With locations in Germany, USA, China, India and Italy, around 320 colleagues support the trend towards ever more powerful battery systems from very small to very large scale.
