

Ideas for the mobility of the future

Apply with us as

Manufacturing and Quality Manager m/f/d

Digatron opens the way to electric mobility with intelligent test systems and computer-controlled equipment for research, production and quality assurance of battery systems. Through our test equipment and systems, we enable the world's leading development labs and manufacturers to produce and optimize today's and tomorrow's energy storage systems.

With locations in Germany, USA, China, India and Italy, around 320 colleagues support the trend towards ever more powerful battery systems from very small to very large scale.

WE OFFER YOU

- a responsible position in a very successful and growing company
- a permanent employment contract
- flexible working hours (37.5 hours/week)
- mobile work
- 30 days of vacation
- individual training and further education offer

YOUR TASKS

- definition of the manufacturing processes and definition of the associated quality targets in cooperation with the COO
- analyze in detail, evaluate, optimize and specify assembly and logistics processes across the entire manufacturing process
- document, publish and conduct training
- co-design of a clear responsibility model for the manufacturing relevant processes and demarcation to the other roles in the company
- supporting the process owners in manufacturing and the operational executives
- create an efficient process and product quality reporting system
- ensure transparency and adherence to compliance requirements

YOUR QUALIFICATIONS

- at least 5 years of experience in analyzing, modelling, optimizing and measuring the efficiency of processes in electrotechnical manufacturing with a focus on control cabinet or device manufacturing
- profound knowledge in methodologies and tools - corresponding certification desirable
- good command of German and English, both written and spoken
- strong analytical skills
- high social competence and experience in interface functions combined with strong communication skills on all hierarchy levels
- genuine enthusiasm for electrical engineering, completed studies in the field desirable
