

Ideas for the mobility of the future

Apply with us as

Software Developer LabVIEW m/f/d

Digatron opens the way to electric mobility with intelligent test systems and computer-controlled equipment for research, production and quality assurance of battery systems. Through our test equipment and systems, we enable the world's leading development labs and manufacturers to produce and optimize today's and tomorrow's energy storage systems.

With locations in Germany, USA, China, India and Italy, around 320 colleagues support the trend towards ever more powerful battery systems from very small to very large scale.

WE OFFER YOU

- a responsible position in a very successful and growing company
- a permanent employment contract
- flexible working hours (37.5 hours/week)
- mobile work
- 30 days of vacation
- an individual training and further education offer

YOUR TASKS

- cooperation in an agile team and with modern development methods
- creation of LabVIEW applications under Windows for configuration and control of our rectifiers
- creation and execution of unit tests
- software documentation
- interface to our HW developers and system testers

YOUR QUALIFICATIONS

- successfully completed engineering or computer science studies or comparable training
- several years of experience in software development
- very good knowledge of LabVIEW (preferably CLD or higher)
- good knowledge of TCP/IP communication
- good knowledge in Office applications
- distinct team and communication skills
- desire and fun to develop further
- good knowledge of German and English, both written and spoken

Please send us your application documents including your salary requirements and your earliest possible starting date by e-mail to jobs@digatron.de. If you have any questions, please do not hesitate to contact Mr. Ralf Bündgen at +49-241-16809-858 or the above-mentioned e-mail address. You can find more exciting jobs at www.digatron.de
