

# Battery Terminals & Lever Handle

## BPK Series

### Battery Terminal (BPK-40):

- Connects batteries to high-current cables safely and tightly.
- For currents > 100 A.
- Made of lead-plated brass.

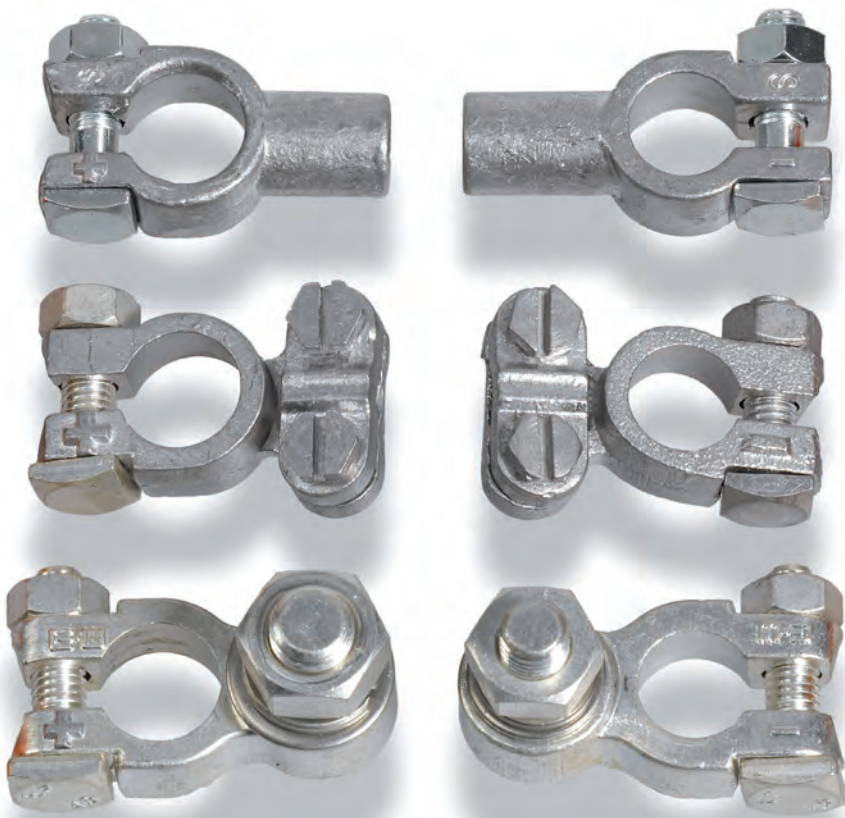

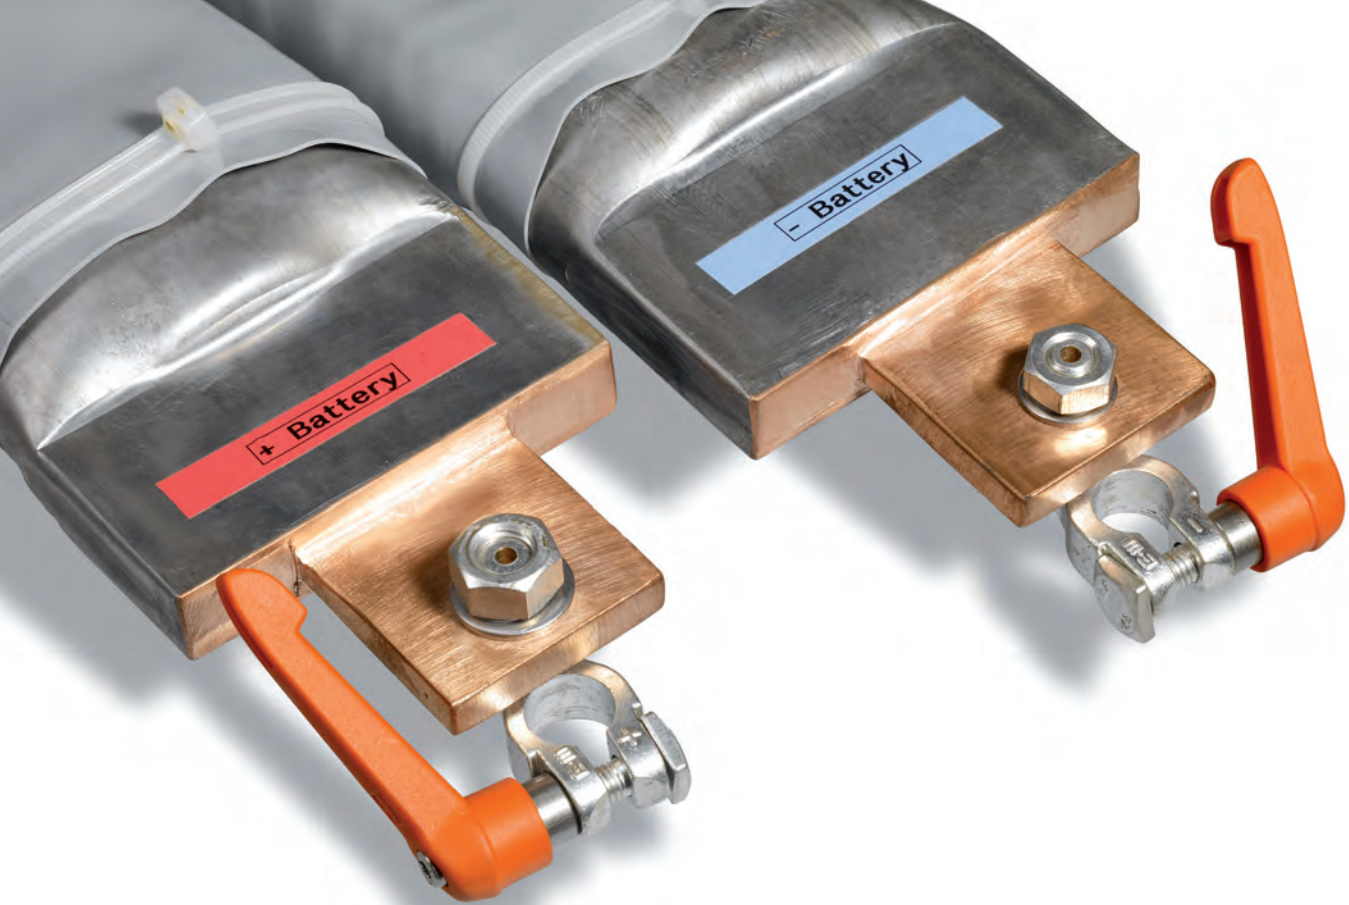

### Battery Terminal (BPK-14):

- Pressed on charge cables with a cross sectional area of 6-10 mm<sup>2</sup>.
- For currents < 100 A.
- It may also be soldered.
- Made of lead-plated brass.

### Lever Handle (BPK-KH):

- For loosening or tightening battery terminals to batteries quickly and safely.
- Handle made of glass fiber reinforced plastic, all metal parts of stainless steel, rust-proof and acid-resistant.
- To turn the lever handle, lift it until the toothed wheels snap out which allows adjustment to the best clamping angle quickly and safely.
